EDUCATION

CALIFORNIA STATE UNIVERSITY, SACRAMENTO

Bachelor of Science, Computer Science

Cumulative GPA: 3.88/4.0; Magna Cum Laude; Dean's List 2023-2025

Relevant Coursework: Software Engineering; Operating Systems; Data Structures & Algorithms; Database Management; Computer System Attacks and Countermeasures

Sacramento, CA

December 2025

UNIVERSITY PROJECTS

E-WASTE GURUS, CUSTOMER PORTAL (Senior Project)

January 2025 - December 2025

- Developed a customer-facing web portal using the Vue framework and Dockerized backend services, automating customer request handling and order tracking.
- Reduced API failure rates by 15% by implementing centralized error-handling and validating edge cases in controller functions using the Vite testing framework.
- Collaborated in 9 Agile sprints with a 7-person team, delivering features iteratively with rapid feedback cycles.

GOFUNDME CLONE

May 2025

- Developed a hybrid storage solution using Solidity smart contracts for immutable financial transactions and Firebase for high-speed metadata retrieval, reducing on-chain gas costs by caching non-critical data.
- Managed asynchronous transaction states with Web3.js, ensuring UI consistency between slow blockchain confirmations and real-time user activity tracking.

SKIN CANCER DETECTION APP (Hornet Hacks Hackathon - Project Lead)

March 2025

Demo: <https://wsc0tt.github.io/SunArmorAi/> Code: github.com/wsc0tt/SunArmorAi

- Directed a 7-person team under a 48-hour deadline, establishing a CI/CD pipeline via GitHub Actions that allowed for simultaneous frontend and ML-model integration.
- Architected a Python-based image processing pipeline that integrated HuggingFace ML models, achieving 80% classification accuracy and delivering a functional MVP.
- Built a responsive React frontend with Tailwind CSS, displaying uploaded images alongside ML predictions with 80% classification accuracy.

WORK EXPERIENCE

HACKINGTONS

Rocklin, CA

Code Instructor

May 2025 – September 2025

- Provided real-time technical troubleshooting and code reviews in JavaScript and Python during live coding sessions with ~30 students weekly, maintaining a 100% project completion rate.

CSU SACRAMENTO

Sacramento, CA

Peer Assisted Learning Facilitator

August 2024 – May 2025

- Supported Java coursework by helping students learn the foundation of Object Oriented Programming through weekly meetings and exercises.

ADDITIONAL SKILLS AND INTERESTS

Languages & Frameworks: Java (Spring Boot), Python (Flask/FastAPI), JavaScript/TypeScript (Node, React, Vue), SQL, Solidity.

Infrastructure & Tools: PostgreSQL, MongoDB, Docker, AWS, GitHub Actions (CI/CD), Git, Linux.

Specialized: Ethereum (Web3.js), Firebase, Jira (Agile).
